WHY TRADING?

TRADITIONAL INSTRUMENTS FIAT/DEPOSITS & MUTUAL FUNDS

Critique: Fixed Deposits & Locks

Traditional deposits lock funds for extended periods with low, fixed returns. Limited control.

Locked Funds: Yes
Low/Fixed Returns: Yes.

Critique: Directional Constraint

Mutual Funds & Stocks typically only profit during rising (Bull) markets. High vulnerability to market downturns.

Long-Only Bias: High.
Bear Market Exposure: Low/None.

Why XAUvsUSD?

1. Hybrid Nature

Combines characteristics of physical commodity and currency pair.

Neither pure commodity nor traditional currency.

2. Safe-Haven Status

Primary go-to asset during periods of political turmoil, conflict, or economic crisis.

3. Strong Inverse Correlation

Historically moves opposite to the USD (weak USD usually boosts gold, and vice-versa).

4. High Volatility & Deep Liquidity

Characterized by large daily price swings (thousands of pips).

Deep market depth for smooth trades.

5. Interest Rate Sensitive

Strongly influenced by US Federal Reserve policy.

High rates can increase opportunity cost.
